MARKER

FOR OVER SEVEN DECADES MARKER HAS STOOD FOR INNOVATION AND SAFETY IN SKIING.

In 1952, Hannes MARKER introduced the world's first ski binding with safety release. In the 1970s, the M-Series revolutionized the binding market with automatic heel release. Since 2007, MARKER has been setting new standards in the freeride and freestyle segments with innovations like the Duke PT and the continuous expansion of the Royal Family.

Introducing bindings such as the Kingpin, the world's first pintech binding with TÜV certification according to DIN ISO 13992:2007, and the Alpinist, MARKER has also been making strides in the touring market since 2014. In 2022, MARKER took a pioneering step in sustainability by using eco-friendly materials like biobased and recycled plastics in the production of the Cruise comfort pin binding.

Since 2022, MARKER has been a part of the Elevate Outdoor Collective.

SUMMARY

LIVING FOR WINTER SPORTS

As a global sports company, our aspiration is to build sustainable and economically successful products. To do this we draw on our long tradition and years of experience, this is what drives and is the motivation of our MARKER employees worldwide. Our teams work hard on bringing innovation into our products so that we can meet the needs of today's and tomorrow's customers. We strive to develop the best possible products for this winter sport we all live for and love.

Collecting industrial waste

Grinding and quality control

Preparation of secondary plastic granulate

Production of new parts

Bio-based plastic pellets

(Organic) castor oil

Castor oil plant and seeds

“We’re firmly convinced that only sustainable business is right. It is our mission as a company to protect the world we live in and the people who work for us, and to contribute towards a more balanced relationship between humanity and the environment.”

RENEWABLE ELECTRICITY

- 100 % certified green electricity at MARKER in Germany and production in the Czech Republic.

COMPONENTS

- 100 % of bonding components are manufactured in the European Economic Area.
- Expanding the use of sustainable materials.

TRANSPORT/DISTANCES

- Short transport routes to reduce our exhaust emissions.

RECYCLING

- 100 % recycling of the metals used.
- 93 % of packaging is made from recycled materials.

RACE

Engineered for unmatched racing performance, our COMP race bindings provide *unparalleled precision and control*. The flagship model in this category, with *cutting-edge technology and aerodynamic design*, guarantees maximum safety and faster speeds, giving you the *competitive edge*.

COMP 30 RD

税込価格 ¥115,500 (本体価格 ¥105,000)
 MARKER's COMP bindings have been an integral part of the Alpine Ski World Cup for years. Countless titles have been won with the Comp series. Nowhere else is the cooperation between Marker engineers and athletes closer than in competition. The Twin Cam heel or the 4-linkage toe piece were developed this way and of course you'll find them the Comp bindings. Manufactured with the highest quality magnesium components, the Comp 30 allows perfect centering on the ski. This means that edge changes can be made with extreme precision, even at highest speeds. The responsive construction, paired with incredibly direct power transmission, creates highest reliability in all situations - an absolute must, especially in races.

COMP 20 RD

税込価格 ¥115,500 (本体価格 ¥105,000)
 MARKER's COMP bindings have been an integral part of the Alpine Ski World Cup for years. Countless titles have been won with the Comp series. All tried and tested components such as the Twin Cam Competition heel or the Competition 4-linkage toe piece are being used again this season. Manufactured with only the highest quality magnesium components, the Comp 20 allows perfect centering on the ski. This is crucial for edge changes executed with extreme precision, even at highest speeds. The responsive construction provides a super direct power transmission, making the binding very reliable in all situations - an absolute must, especially in competition.

COMP 16 RD

NEW

税込価格 ¥83,600 (本体価格 ¥76,000)
 MARKER's COMP bindings have long been a cornerstone of the Alpine Ski World Cup — trusted in countless victories. The new Comp 16 RD continues that legacy, delivering the ultimate setup for the next generation of WC racers.

Featuring the proven Competition 4-linkage toe piece and Comp TCX heel, the 16 RD is crafted from premium magnesium components for maximum strength and minimal weight. Its design enables perfect ski centering at lower DIN settings than its big brother, ensuring lightning-fast edge changes with absolute precision — even at top speeds. The responsive construction guarantees direct power transmission and total reliability in every race situation. Because when it comes to competition, nothing less will do.

KEY FEATURES

LEAVE YOUR COMFORT ZONE PUSHING BOUNDRIES

Competing is in our genes. No matter if you are a pro athlete or a beginner, everyone likes a challenge. To learn and improve you need to challenge yourself and push boundaries: New skills are learnt when you are out of your comfort zone. To leave those comfort zones and push your boundaries you need to trust yourself and your material.

AGILITY

Increased strength and stiffness plus more direct power transmission and a improved feedback.

POWER TRANSMISSION

World Cup screw connection on the toe and heel offers the ultimate skiing experience.

PERFORMANCE

InNew absorber for improved dynamics and next level release.

COMP 16

税込価格 ¥55,000 (本体価格 ¥50,000)

Maximum reliability and power at the highest speed and extreme edge angles on prepared slopes: the Comp 16 replaces the XComp 16 with a revised TCX heel piece and adapted Comp toe piece. All components and materials belong to the top category. The one-part toe piece comes with magnesium components (the current heel piece is more rigid) to withstand more pressure and delivers a more direct transmission of force to the ski thanks to a drilling pattern borrowed from the World Cup. At the same time, in the reverse direction, the feedback is more noticeable for the skier, making it easier for them to adapt to different slope conditions. The tried-and-tested value of up to 16 enables optimum ski performance for all ambitious piste carvers and amateur racers.

COMP 12

税込価格 ¥47,300 (本体価格 ¥43,000)

The Comp 12 is optimally adapted for competitive racers who seek the greatest possible reliability and power at all speeds and edge angles on prepared slopes. It replaces the XComp 12 and joins the race with a revised TCX heel piece and adapted Comp toe piece. The current heel piece is more rigid and harder and delivers a more direct transmission of force to the ski thanks to a screw position borrowed from the World Cup. At the same time, the feedback is more noticeable for the skier, making it easier for them to adapt to different slope conditions.

COMP¹⁰ TCX

税込価格 ¥33,000 (本体価格 ¥30,000)

Welcome to the world of youth racing. The Comp 10 TCX uses the same heel technology as in the Comp bindings, combined with the tried-and- tested TLT toe pieces and all perfectly adjusted to the weight and skiing performance of young on-piste racers. This binding enables top skiing performance with great power transfer.

COMP¹⁰

税込価格 ¥26,400 (本体価格 ¥24,000)

The Comp 10 offers exactly what racing kids need: the right components to climb the ladder in racing competitions. The Compact 3 heel provides easy step-in comfort and great power transmission for lightweight riders and the light and sturdy TLT toe handles lateral and backwards release. The binding works especially well in combination with the Jr Race interface. Compatible with adult boot lug only.

WC PC INTERFACE

税込価格 ¥38,500 (本体価格 ¥35,000)

The Piston® Control Interface derived from World Cup interfaces comes with an integrated high-tech oil-hydraulic damper which converts energy directly into speed. The skiing experience is simply stunning, because the Piston® Control System only reacts to negative rebound and shocks, the turn initiation is faster, the edge grip more direct, effortless from turn to turn. Compared to the previous version, a softer center piece has been installed, which ensures a more homogeneous flex over the entire length of the ski. The new hole pattern with extended mounting options ensures optimum hold and function on all ski models. The new, more stable clamps ensure improved power transmission, especially at the end of the turn. It's a perfect match with all race skis and fully compatible with all MARKER Race bindings.

DUKE PT¹⁶

税込価格 ¥ 118,800 (本体価格 ¥ 108,000)

The Duke PT 16 (DIN 6-16) is Royal Family's top model and sets another milestone. It combines the superior functionality and downhill performance of a Jester with comfortable uphill properties of a pin binding. An absolute highlight is the innovative Ride & Hike toe. For walking mode the upper part is simply unlocked and tilted forward, uncovering the pin binding. To save swing weight the upper jaw part can be taken off and stored in the backpack. The multi functional Lock & Walk unit automatically locks the brakes and provides a 10° climbing aid. For downhill mode the front jaw section is clicked back onto the base plate being quadruple secured by the Auto Quad Lock technology. Now the toe piece works just like an alpine toe with all of its advantages! The heel is the latest generation of Interpivot 3 freeride heels with lightweight magnesium housing and improved stiffness. The low height of 24 mm allows for direct power transmission and fast edge changes. Thanks to Multinorm, all Duke PT are compatible to alpine, touring and GripWalk boots.

KEY FEATURES

JESTER X 16 MWERKS *X SERIES*

税込価格 ¥66,000 (本体価格 ¥60,000)

Since its launch over 10 years ago, the name Jester has stood for the best freeride performance in literally all conditions.

The Jester X 16 MWERKS now features some amazing improvements: The TP Elite X toe piece housing is made from a single cast, making the whole construction even lighter, more compact and therefore more stable. Thanks to the new alloy the anti-ice rail is more robust than ever and ensures great lateral power transmission. The high-quality metal frame results in a shorter yet more stable and reliable construction. But the most impressive new feature, made possible by the brake integrated into the design, is the stand height of 14 mm instead of the previous 24 mm. This makes the X Series to our lowest stand height freeski binding yet! Power transmission couldn't be more direct!

Whether in the park, in the pipe or off-piste, with a DIN-setting of 6 - 16, the Jester X MWERKS delivers ultra-precise control and allows ski, binding and boot to basically merge into a single unit. The powerful orange color accents make the Jester X 16 MWERKS recognizable from afar.

KEY FEATURES

GRIFTON X¹³ NEW COLOR MWERKS X SERIES

税込価格 ¥55,000 (本体価格 ¥50,000)

This performance freeride binding is optimized for lighter riders and is equipped with the same features as its big brother, the Jester X MWerks, apart from a DIN setting of up to 13. In the coming season, the housing of the TP Elite X toe is made from a single cast. This makes it even lighter, more compact and therefore more stable. The anti-ice rail is more robust than ever, thanks to the new alloy. The most impressive feature is the incredibly direct power transmission made possible by the integrated brake, allowing a stand height of 14 mm instead of the previous 24 mm. On the new TP Elite X toe, the stand height is an impressive 9 mm.

Whether in the park, in the pipe, or off-piste, the Griffon X 13 MWerks delivers super-precise control with a Z-value of 4 to 13, allowing the ski, binding, and boot to merge into a single unit.

GRIFFON¹³ MN

税込価格 ¥47,300 (本体価格 ¥43,000)

The sibling to Griffon X MWorks, with already well known features for younger and lighter riders, is one of the most versatile freeride bindings on the market today, made for advanced to expert skiers. The Griffon MNB is equipped with the Triple Pivot Elite 4 toe and Inter Pivot 4 freeride heel. Both are light and stiff and deliver improved edge grip and control in a modern look. In addition, the Anti Ice Rail ensures effortless scraping off snow and ice from the boot sole. Its Multinorm technology allows to adjust the binding to accommodate either touring, GripWalk or alpine boot sole norms. Griffon MN is available with 90, 100, 110 and 120mm brakes.

GRIFFON X¹³ X SERIES

税込価格 ¥49,500 (本体価格 ¥45,000)

Light, agile, and built for playful descents– the new Griffon X is the little brother of the Griffon X MWorks, tuned for skiers who want maximum fun without sacrificing performance. Thanks to the use of high-tech plastics in both heel and toe, the Griffon X is even lighter and more vibrant, giving you the confidence to push your style on every run.

The compact construction creates a tight turn radius, keeping your riding sharp and responsive on groomers and in backcountry conditions alike. With Markers lowest Freeski Binding stand height yet at just 14 mm, the Griffon X delivers a smoother edge feel in freeride terrain and maximum fun in the park & pipe. Quick edge changes, buttery control, and effortless transitions make it your go-to binding for all-mountain creativity. Whether you're carving fast lines, hitting jumps, or exploring off-piste, the Griffon X is designed to keep things playful, precise, and light underfoot.

KEY FEATURES

SQUIRE¹¹ NEW COLOR

税込価格 ¥35,200 (本体価格 ¥32,000)
 The Squire 11 has progressive looks and is specially designed for lighter weight but fully motivated freeride and freestyle rookies. A lightweight Triple Pivot Light toe piece features a distinctive Ice Off Rail to keep the sole free of snow and ice. A state-of-the-art Hollow Linkage heel with its wider boot holder reduces the step-in force by approximately 35%, even with GripWalk soles. All in all, the Squire 11 is very compact and, despite its GripWalk compatibility, only 24 mm high, which allows a very direct feel and ski control. Available in five colour combinations.

KEY FEATURES

TOURING

Our Touring bindings, including the pioneering Kingpin and the latest Alpinist Free, offer *unmatched efficiency* for *uphill climbs* and *powerful control* on the *descent*. With *lightweight design* and *seamless transitions*, these bindings provide the *perfect balance* of mobility and performance, making them the top choice for *backcountry adventurers*.

PERFORMANCE BOOSTER

For direct power transmission and the ultimate downhill performance.

ALPINIST DESIGN

With all the advantages of the Alpinist product family.

ALPINIST FREE BASE

For the ultimate ski experience with an even more reliable descent.

ALPINIST FREE¹¹

The Alpinist Free with a Z value of 4.0 to 11.0 weighs just 395 g including the brake and delivers noticeably improved force transmission and ski performance thanks to the new wider base area. The Alpinist Free binding is the first choice when every gram counts on long ascents followed by unforgettable freeride descents.

Like the predecessor model, in addition to the Alpinist heel piece, it is equipped with the extra rigid, carbon-reinforced ISI toe piece, whose wider platform enables simplified and intuitive step-in. The clever kinematics of the pin lever allow the pins to be snapped in with very little force. The Alpinist's heel piece offers a full 35 mm adjustment range as well as 0°, 5°, and 9° climbing aids. The wide drilling pattern of the Alpinist Free also supports the very good transmission of force to the edges and the overall design allows active length compensation, which does not affect the ski's flex behaviour. The Alpinist Free is made from sustainable materials such as recycled or bio-based plastic.

ALPINIST¹²

The ultra-light Alpinist pin binding (270 g without brake) provides all that experienced touring skiers require. With a DIN range of 6 to 12, its advanced construction allows for active length compensation without interfering with the ski's flex. A sturdy, carbon-reinforced front with an ISI toe piece simplifies entry, while a wide footprint with an integrated stop automatically positions and aligns your boot. Kinematically optimized pin levers enable the pins to snap shut with just a gentle push. The heel features climbing aids at 0°, 5°, and 9°, easily switched between ascent and descent modes. A 38 mm wide hole pattern effectively transfers power to the edges, ensuring exceptional control and steering.

ALPINIST⁸

The ultra-light (270 g not including brake) and durable touring pin binding for high alpine challenges with DIN settings up to 8, specifically optimized for light weight touring enthusiasts. Its construction allows active length compensation without affecting the ski's flex. A very stiff, carbon-reinforced front with an ISI toe piece makes the binding easier to step into, as a wide footprint with integrated stop automatically positions and aligns your boot. Kinematically optimized pin levers then allow the pins to snap shut with just a gentle push. The heel features 0°, 5° and 9° climbing aids and can be switched quickly and easily from ascent to descent mode. A 38 mm wide hole pattern transfers power brilliantly to the edges, which means control and great steering.

KEY FEATURES

ALPINIST^{JR} LONGTRAVEL

税込価格 ¥74,800 (本体価格 ¥68,000)

The Alpinist Junior Long Travel combines maximum performance with minimum effort. If you want to get serious about touring, you can't get around a pin binding. The Alpinist JR is designed for a skier's weight up to about 65 kg, for children and young people who regularly go to the mountain and need optimal performance. The DIN range is adjusted with 2 - 6 for the young tourer. The heel adjustment range of 35 mm (-7.5 / +27.5mm) also allows the binding to grow over a wide range. Three walking modes 0°, 5° and 9° offer the best ascent comfort in any terrain. Basically, the Alpinist JR has all the features of its „big“ siblings. However, thanks to the Junior U-Bow, young skiers also benefit from the reduced entry forces and the low weight of only 360 g (with brake) per binding, which is mainly thanks to the extra-light fiberglass-reinforced climbing aids. The Alpinist JR Long Travel is delivered with a 90 mm brake.

KEY FEATURES

F5^{JR} TOUR

税込価格 ¥46,200 (本体価格 ¥42,000)

The F5 JR Tour with a DIN range from 1.5 to 5 is a binding for all occasions and every adventure. Whether on the slopes or climbing to the next peak - nothing stands in the way of the perfect ski day. The frame binding offers all the touring features for ascents, such as the 0°, 7°, and 13° climbing aid, but also delivers optimal transmission of energy and performance on the downhill run due to the frame weighing only 880 g. So it is ideal for every ski day. The toe piece and base plate are compatible with all common boot models, whether children's or adult boots, alpine or touring boots. GripWalk soles also fit into the F5 JR Tour, which complies with every ISO standard. The sole length can be adjusted from 235 to 300 mm, so the binding can grow with the child for a few seasons.

ALL MOUNTAIN

Our All-Mountain bindings deliver *exceptional performance across all terrains*. Combining *power, control, and comfort*, they ensure *precise energy transfer and stability*, whether you're *carving groomers or exploring off-piste*. Perfect for riders who want versatile bindings to conquer the whole mountain.

COMP¹⁶ GW

税込価格 ¥55,000 (本体価格 ¥50,000)

The high-performance binding for ambitious on-piste skiers is now also suitable for GripWalk soles. This enables the greatest possible walking comfort, easy step-in, and excellent grip in the binding. The Comp 16 GW black is manufactured exclusively with the highest quality components. The one-part Comp toe piece features magnesium components as well as error forgiving absorbers underneath. The Comp absorber reliably absorbs short, hard shocks and permanently centres the ski boot in the binding.

COMP¹² GW

税込価格 ¥47,300 (本体価格 ¥43,000)

The Comp 12 GW black is also suitable for boots with GripWalk soles. It has the same high-quality design as all Comp models and includes DIN values from 4.0 to 12.0. The one-part screw connection of the toe piece by means of a 3-point hole pattern results in an extremely direct force transmission, which is not diminished by the absorbers underneath providing error-forgiving characteristics. The Comp absorber absorbs short, hard shocks and always keeps the ski boot optimally centred in the binding.

NEW

GRIFFON¹³ D

税込価格 ¥58,300 (本体価格 ¥53,000)

The lighter version of the Jester, providing the same features for younger and lighter riders, is one of the most versatile freeride bindings on the market today, made for advanced to expert skiers. The Griffon 13 D is equipped with all Triple Pivot Elite toe and Inter Pivot 4 freeride heel. Both are lighter and stiffer than previous parts and deliver improved edge grip and control and easy entry. The Anti Ice Rail makes it easy to scrape off snow and ice from the sole. Due to the FDT technology, another important feature for the rental business is the toolless length adjustment of toe and heel. Griffon 13 D is available with 90, 100, 110 and 120mm brakes.

ALPINIST DEMO¹⁰

税込価格 ¥97,900 (本体価格 ¥89,000)
 Designed for rentals, the Super-light pin binding with DIN 10 combines performance and convenience. It includes a comfortable ISI toe piece and a pre-mounted brake, with an adjustment range that accommodates sole lengths from 253 to 359 mm. The binding sits on a weight-optimized plate featuring a scratch-proof scale and allows for effortless adjustments without tools by simply pressing a lever. The boot is automatically positioned and aligned on the wide footprint with an integrated stop. A kinematically optimized pin levers let the pins snap shut with minimal effort. Similar to the other Alpinists, this binding offers active length compensation in the ski flex area and excellent power transmission during descents, thanks to a 38 mm wide hole pattern. The heel features 0°, 5°, and 9° climbing aids for quick and easy transitions between ascent and descent modes.

ALPINIST DEMO⁸

税込価格 ¥95,700 (本体価格 ¥87,000)
 The Super-light pin binding with DIN 8 is expertly designed for rental use, featuring a comfortable ISI toe piece and a pre-mounted brake. It offers an adjustment range for sole lengths from 253 to 359 mm. The binding is mounted on a weight-optimized plate with a scratch-proof scale, allowing for tool-free adjustments with just the press of a lever. The wide footprint with an integrated stop automatically positions and aligns the boot for ease of use. Kinematically optimized pin levers enable the pins to snap shut effortlessly with a gentle push. Like the other Alpinist models, this binding includes active length compensation in the ski flex area and ensures impressive power transmission during descents, thanks to a 38 mm wide hole pattern. The heel features 0°, 5°, and 9° climbing aids and allows for quick and easy switching between ascent and descent modes.

KEY FEATURES

CRUISE¹⁰ DEMO

税込価格 ¥107,800 (本体価格 ¥98,000)

The Cruise 10, which was successfully launched in 2023, is now also available as a rental binding. This makes it easy to enter the world of ski touring and – thanks to the ISI toe piece – simplifies pin binding step-in even further. With two color-coded climbing aids, the easy-to-use heel piece ensures comfortable climbing at 0°, 8°, and 12° on virtually any slope. The ergonomic design allows the heel piece to be rotated 180° for a comfortable, automatic brake lock. This makes switching from walking to skiing mode and back extremely easy.

Occasional tourers also benefit from the independent adjustment of vertical and horizontal release, as this significantly reduces the risk of false release, especially during descent.

We think about tomorrow! Without compromising on quality and performance, the Cruise 10 Demo is largely made of bio-based and recycled plastic fibres. This reduces waste and carbon emissions compared to the conventional manufacturing process.

TECHNOLOGY KEY FEATURES SUMMARY

BOOT TYPES

- A Alpine Adult sole
- C Alpine Children sole
- GW A GripWalk Adult sole
- GW C GripWalk Children sole
- T Touring Boots

CLIMBING AIDS

CRUISE

Thanks to the climbing aids, walking uphill is comfortable. They can be operated quickly and easily in any situation thanks to their design with the pole baskets. The color-coded heel lifts enable three climb modes (0°, 8° and 12°).

KINGPIN

The climbing aid offers two positions with 7° and 13° which can easily be accessed with the ski pole, even in an unstable standing position.

ALPINIST

Neutral walk mode and two climb modes with 5° and 9°. The fast adjustment mode allows quick switching between 0° and 9° without having to turn the heel.

FRAME TOUR

The titanal ascent aid, conveniently adjustable via ski pole, can be locked in two positions at 7° and 13°. Integrated elastomer damping elements make ascending more pleasant, simply because the irritating „clacking noise“ is eliminated.

ACTIVE LENGTH COMPENSATION

CRUISE

Active length compensation in the heel allowing the heel to move back up to 7mm when the ski is flexed.

ALPINIST

Active length compensation at the heel, so that the heel can move back up to 4 mm when the ski is flexed.

LENGTH ADJUSTMENT

CRUISE

The Cruise heel offers a 25mm heel adjustment range (+/- 12.5mm).

ALPINIST

The Alpinist heel offers a heel adjustment range of 15 mm (from 7.5 mm to +7.5 mm).

ALPINIST LONG TRAVEL

The Alpinist long travel heel offers a heel adjustment range of 35 mm (from -7.5 mm to +27.5 mm).

KINGPIN

The Kingpin heel offers a heel adjustment range of 25 mm (from -10 mm to +15 mm).

BRAKE

ALPINIST / ALPINIST LONG TRAVEL

Optional brake for MARKER ALPINIST models. Improved usability on both brakes.

CRUISE

The brake locks automatically as soon as the ski boot is placed on the brake. The brake releases automatically when rotating the heel 180°.

LOCK & WALK

The multi functional Lock & Walk unit automatically locks the brakes and provides a 10° climbing aid.

X-BRAKE

The completely redesigned X-Brake is fully integrated into the heel plate, thus enabling an impressive stand height of only 14 mm. This gives the new X Series bindings an even more direct feel and also improves power transmission. The new X-Brake is available in widths of 90, 105, 120 and 132 mm.

HEEL

CRUISE

The ergonomically designed heel section ensures a simplified and as effortless change from ski to walk mode as possible by just rotating the heel by 180°.

ALPINIST

Alpinist heel with adjustable lateral release with various DIN options and 15mm heel adjustment range (+/-7.5mm). Offers three walking modes thanks to the hot forged aluminum climbing aid. The „Fast Shift Mode“ allows quick switching between neutral and maximum climbing aid. The active length compensation in the heel allows constant power transmission and release performance, even when the ski is flexed.

KINGPIN

The revolutionary heel construction for PinTech bindings with widely spaced sole contact points provides lossfree and very direct power transmission, as is normally only known from alpine bindings. Also in terms of safety, the Kingpin offers until now unknown advantages.

KINGPIN CARBON REINFORCED

The revolutionary heel construction for PinTech bindings with widely spaced sole contact points provides lossfree and very direct power transmission, as is normally only known from alpine bindings. Also in terms of safety, the Kingpin offers until now unknown advantages.

HOLLOW LINKAGE 2

The latest generation of Hollow Linkage heel Improved step-in performance: 30% reduction in step-in force and easier step-in with GripWalk soles.

HEEL

INTER PIVOT 3

The latest generation of Inter Pivot heel for excellent downhill performance in the style of the Royal Family. Z-value up to 16. The third and latest generation completely renewed: improved power transmission, energy absorption and vertical heel elasticity combined with improved comfort.

COMPACT 3 HEEL

The latest generation of MARKER's Compact heel. A statement of efficiency - with the usual optimized MARKER release properties and the perfect mix of great design, lightness and excellent functionality. This heel technology is perfect for beginners and occasional skiers due to improved release properties and is an excellent value.

COMP TCX HEEL

The next logical step in the improvement of our TwinCam heel, with more power, higher elasticity in the release and an optimized performance curve. The construction increases the boot and ski connectivity for a longer period, even in extremely steep terrain, ensuring more precise ski guidance until released. It also offers improved power transfer through the wider connection of the heel rail (43 mm).

INTER PIVOT X HEEL

The ultra-compact metal frame of the newly designed Inter Pivot X Heel allows for an amazingly short construction. The next generation of the Inter Pivot heel thus enables particularly tight turn radii, especially on-piste or in hard terrain. It delivers fantastic downhill performance in pretty much every snow conditions. Power transmission and energy absorption provide first-class action as always.

TWINCAM COMPETITION

The TwinCam construction delivers super impressive racing qualities in competition like no other technology. In terms of performance, stability and reliability, the TwinCam heel was and still is the first choice in the Alpine World Cup.

TCX LIGHT HEEL

Experience the next evolution in binding technology with the TCX Light. Built on the same advanced kinematics and engineering as our proven TwinCam heel, the TCX Light delivers superior performance with lower entry forces and enhanced comfort. The innovative design maintains precise boot-to-ski connectivity and optimized power transfer, all while offering a more user-friendly and effortless step-in experience. Perfect for skiers seeking reliability, control, and ease of use in every turn.

TOE

ISI TOE

Rubber stop pad fixes the toe of the shoe during entry. Wider entry platform. Widened sole reception at entry. Easier entry — the shoe locks into the binding with significantly less effort.

TRIPLE PIVOT LIGHT 2

The latest generation of Triple Pivot Light 2 toe is not only lighter, but also got the practical and solid Anti Ice Rail, which allows you to scrape snow and ice from the sole. The toe is GripWalk-ready, so it fits conventional alpine as well as modern GripWalk soles.

TRIPLE PIVOT ELITE

The latest toe construction with DIN/ISO 40-13.0 enables breathtaking holding forces when freeriding. The cross-mounted spring in the toe piece and the 5° inclined sole holder offer maximum energy absorption and thus reduce false releases. The large contact surface optimizes power transmission and allows the highest loads. Toe pieces with this technology thus achieve unbeatable performance in relation to their weight - following the example of the X-Series.

RIDE & HIKE

For excellent downhill performance in the style of the Royal Family and release function together with pin technology for the perfect ascent; Z Value up to 16. Removable toe piece: saves 300g per foot on the ascent.

TLT (2LINKAGE) TOE

The next level of improvement for the tried-and-tested two linkage toe system. Light, robust, full side and rear release with improved DIN range. The release springs, triggered by the sole bracket, uses the clever TLT system to provide rear release without taking up extra space or adding extra weight.

TRIPLE PIVOT ELITE X

The one-piece housing is stronger and at the same time more compact than ever before. The new design allows a super low stand height of just 9 mm. It cannot get more direct! The newly developed Anti Ice Rail also impresses with its lateral power transmission. The new X-Series components simply deliver impressive Freeride and Freestyle performance in all conditions.

COMPETITION 4 LINKAGE

The tried and tested 4-linkage construction with a high metal content stands for 100% competition performance. The construction delivers consistently excellent grip and impressive power transmission even in the toughest conditions on all slopes.

COMP TOE

The one-piece housing, designed and manufactured with the highest quality materials, is characterized by fantastic piste performance and shock absorption. The modern, streamlined design marks the latest generation of the Race line.

CRAMPON

CRAMPON OPTION

Easy to mount crampons for KINGPIN, Alpinist and CRUISE available in sizes 80 mm, 90 mm, 105 mm, 120 mm.

MATERIALS

BIO-BASED PLASTICS

Bio-based plastics are used in components with maximum mechanical load. They have the same mechanical properties as conventional plastics, have a lower CO2 footprint and do not consume fossil resources such as oil or natural gas. The bio-based plastics are used, for example, for the climbing aids and the toe.

RECYCLED MATERIALS

Recycled plastics have the best environmental footprint and reduce waste at the same time. To meet our high quality and safety standards, we have pursued a consistent Design for Sustainability approach. The material is used for components under less stress, and the component geometries have been specially designed for the properties of recycled plastic.

MAGNESIUM PARTS

As THE lightest and most robust metallic construction material, magnesium is perfectly suited for our high-end products. This means you are equipped for even faster runs and the most radical lines!

MULTINORM (MN)

MN

Height-adjustable gliding plate to be compatible with all adult boot soles on the market; Compatible with: Alpine (ISO 5355 A), Touring (ISO 9523) and GripWalk (ISO 23223 A) soles; Easy to adjust: Pozi screw at the front to adjust height of gliding plate.

GRIPWALK

GW

The sole-binding system for better walking comfort and top skiing performance. GripWalk contains of a new copolymer sole with rocker profile. The convex shape and ribbed tread of the rubber add a lot of walking comfort and provide a much better grip. Still, integrated pads made of stiff and rigid materials, enable great power transmission and more precise release function of the binding. GripWalk soles are the perfect tuning parts designed for selected premium ski boots and bindings.

GLIDING AFD

AFD

MARKER bindings are equipped with a moveable AFD (anti friction device) supporting a precise release almost entirely unhindered by dirt, snow and ice! Individual adjustment of the AFD to the area of application enhance optimized functionality - for racing, for children's bindings or on ski tours.

ANTI ICE RAIL

ANTI ICE RAIL

The metal rail helps to scrape ice and snow from the sole of the shoe.

AUTO QUAD LOCK

AUTO QUAD LOCK

Front jaws lock automatically at four different points when entering the binding.

PERFORMANCE BOOSTER

ALPINIST FREE PERFORMANCE BOOSTER

The name says it all. The Marker Performance Booster plate is available in three sizes and can be fitted to all Alpinist Free brakes. The enlarged contact surface allows pressure to be applied to the ski in a more controlled and evenly distributed manner. As a result power transmission is noticeably improved.
